

Aluminium  
Deutschland

## Facts about Aluminium Deutschland e. V.

Aluminium  
Deutschland e. V. is  
the industry  
association of the  
German aluminum  
industry.

Founded in  
1992 in  
Dresden

Located in  
Düsseldorf since  
1993

17 employees in  
different  
departments

Approximately 150  
members belong to  
the association

We work  
together with  
national and  
international  
associations and  
organisations.

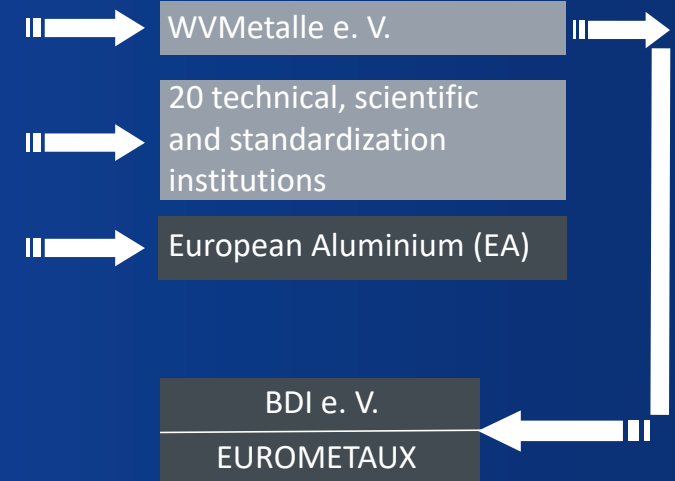

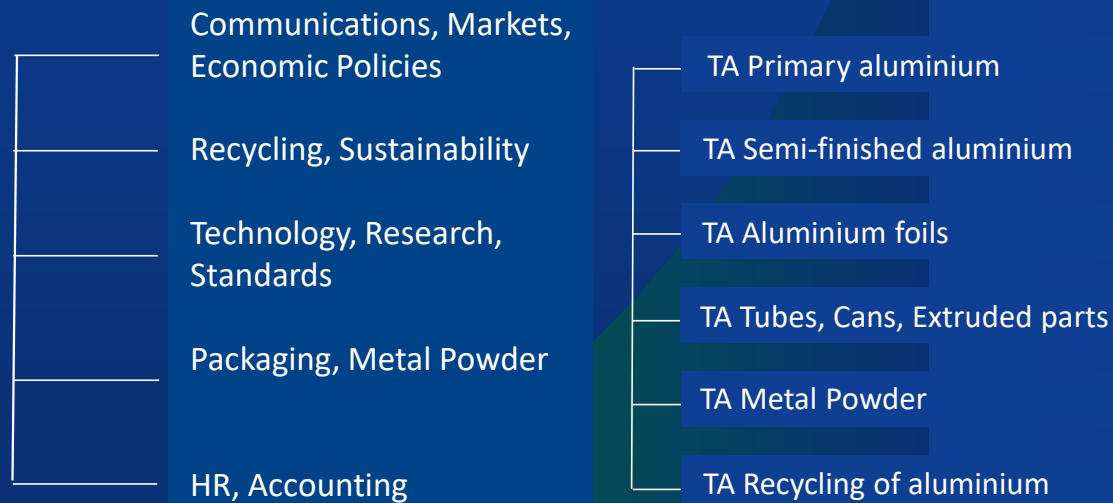

an organization rate  
of approximately  
96 % based on the  
production of the  
German aluminium  
industry

Our mission is to represent  
the collective interests of  
our members, and thereby  
the entire industry, in all  
areas of the aluminium  
sector!

# Organisational structure of Aluminium Deutschland

## Aluminium Deutschland e. V. (AD)

(Director General: Angelika El-Noshokaty)

Membership

## Our missions

To communicate the economic, ecological and technical advantages of the material aluminium, even in competition with other materials and thereby increase the use of the material in the world of tomorrow.

To realize the economic, ecological and social concepts of the aluminum industry in the sense of sustainability.

To persistently continue the path toward realizing sustainable and future-oriented development in the aluminum industry and in dialogue with all societal groups.

## Benefits of membership

- Networking opportunities and network development
- Participation in members' meetings and other events
- Webinars and workshops on current topics, as well as further education and training
- Participation in and access to market research
- exclusive access to important industry data and information
- Advocacy at the political level
- active participation in public relations efforts
- Opportunities to engage in joint projects and initiatives (e. g. research projects, standards or studies)
- **The opportunity to strengthen the industry, your company's success and the image of the material!**

## Good to Know! Facts About Aluminium

Aluminium is a permanent material and can be **infinitely recycled**.

Aluminium is the **third-most element** on earth. Bauxite, the raw material for aluminium production, is abundantly available with known resources for **more than 200 years**.

Recycling **saves 95 % of the energy** required to produce primary aluminium.

Aluminium is **recycled in a closed material loop** and used in ever new applications.

**75 %** of the aluminium ever produced is **still in use**.

**Light-weight** aluminium saves energy during transport.

Aluminium is widely used in Automotive Applications, all forms of Semi-products and various Qualities and Alloys are available.

# We are Member of

**AMAP** (Advanced Metals and Processes / Forschungscluster RWTH Aachen)

**ArGeZ** (Arbeitsgemeinschaft Zulieferindustrie)

**asi** (aluminium stewardship initiative)

**BDG** (Bundesverband der Deutschen Gießereiindustrie)

**BDS** (Bundesverband Deutsche Startups)

**DGNB** (Deutsche Gesellschaft für Nachhaltiges Bauen)

**DIN** (Deutsches Institut für Normung)

**EA** (European Aluminium)

**GSB International** (Gütegemeinschaft für die Stückbeschichtung von Bauteilen)

**VDA** (Verband der Automobilindustrie)

**VOA** (Verband für die Oberflächenveredelung von Aluminium)

**WSM** (Wirtschaftsverband Stahl- und Metallverarbeitung)

**WVMetalle** (Wirtschaftsvereinigung Metalle) .... AND FURTHER MORE
